

UrinoVet Cat Dilution

The most comprehensive composition – the strongest support in struvite urolithiasis from **VetExpert**

DL-methionine

decreases urine pH; helps to dissolve existing struvite crystals and stones; helps to prevent from recurrence

Vitamin C

decreases urine pH; helps to protect from urinary tract infections recurrence

Cranberry

contains proanthocyanidines which after binding with surface receptors of pathogenic bacteria prevent from bacteria adhesion to urinary bladder cells

Parsley

helps to stimulate urine production and thereby enhances bacteria removal from urinary tract

Nettle

thanks to diuretic and natriuretic action increases urine production

Vitamin B6

helps to prevent from oxalate formation in urinary bladder

Glucosamine

helps to create surface barrier on urinary bladder cells and to prevent from toxins and bacteria transfer through bladder wall

Valerian

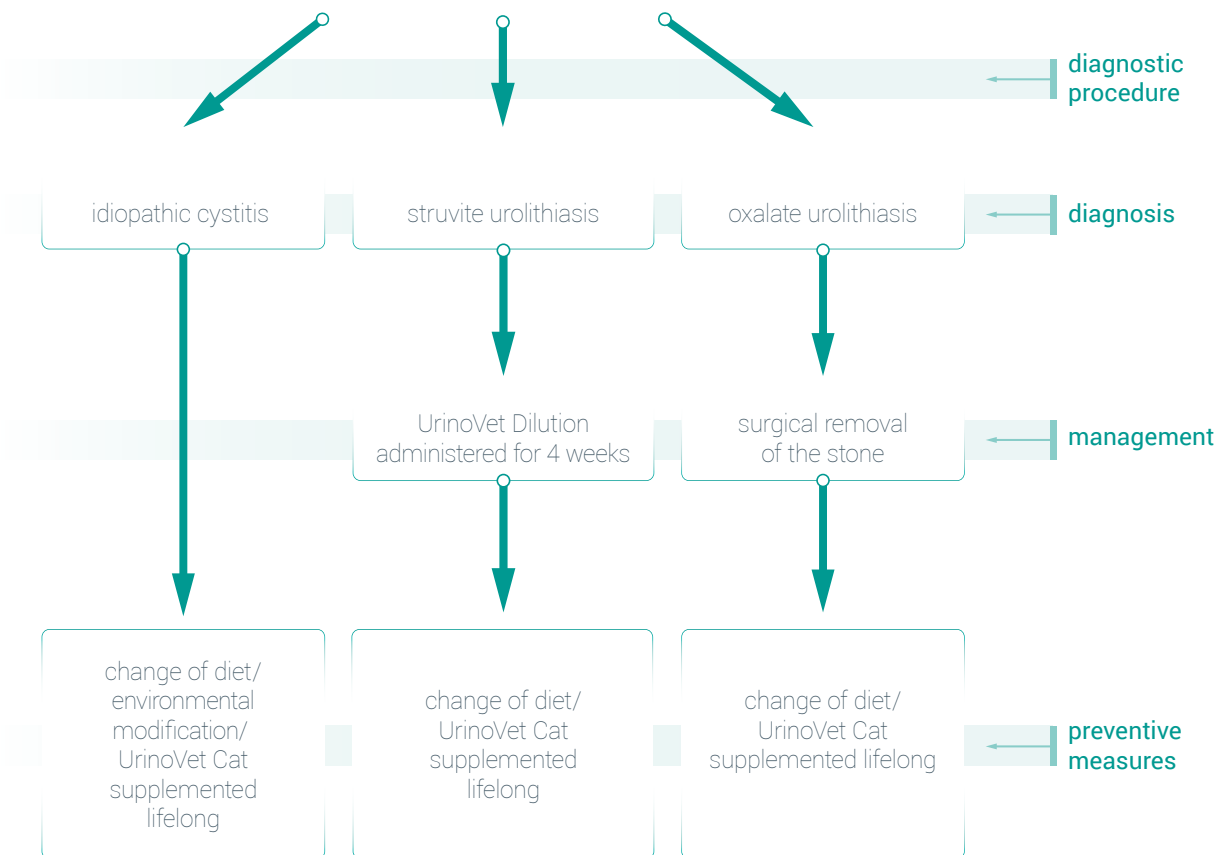

thanks to mild sedative and anxiolytic effect helps to prevent from idiopathic cystitis recurrence

Twist off capsules guarantee high palatability and ease of application

Algorithm for the management of suspected feline lower urinary tract disease (FLUTD)

COMPREHENSIVE SUPPORT OF URINARY TRACT
